

## Ms. Ensminger's News

Week of 10/10

Good Morning! I would like to thank families for all of their support at home. You have been a gift to me; helping me change into my new position at St. Christopher and helping the kids grow into the new school year.

5<sup>th</sup> Grade Science: We have started our first STREAM project. Students are using what they learned about the scientific method to figure out "What's in the Box?" When this project is finished we will begin a unit on matter.

6<sup>th</sup> Grade Science: Sixth grade also started their first STREAM project. We are using the scientific method to determine the amount of water that will let us flip a water bottle and have it land up right most often. We will also attempt to determine the kind of bottle that gives us the best chance of landing a bottle up right. We will be calculating the averages, and reporting on our results. When this project finishes we will be discussing science and technology.

5<sup>th</sup> Grade Religion: We have completed an overview of the seven Sacraments, and now we are going to look at each one in depth. We will begin with Baptism. Students will be writing about their Baptism, so they will need to look to parents and God Parents for information about this wonderful day.

Have a great week,

Ms. JoAnn Ensminger
