

From the Desk of Miss Sutherland

Grade 6

Week of February 2nd – February 9th

Just a reminder that students are expected to be in school each day by 7:47. If they are not in their seats by that time, they are considered tardy and marked that way in the attendance book. We start classes immediately at 7:55. When students arrive late, not only are they rushing (which sets the tone for their day) but they are also interrupting another class that has already begun! They have also missed any morning announcements! Thank you!

We managed to get a little math done during Catholic Schools Week. We have begun our short chapter on integers which includes identifying and graphing integers on a number line, naming their opposites and finding the absolute value of each. We will order the integers and then move right into rational numbers and look at terminating and repeating decimals.

Next fast facts test will be sometime next week. This time students will have to complete 100 multiplication problems in 4 minutes.

We finished the story of Moses and the Israelites. Students will answer comprehension questions about the story and then we will take an in depth look at the Ten Commandments. This will hopefully lead to many serious discussions that make the students become more aware of their actions and behaviors that make them Christians!

Lent begins on February 14th and I will be incorporating lessons about the season of Lent during the weeks leading up to Easter.

Next prayer journal entries (41-50) are due on February 28th

A little math humor.....
