

Ms. Ensminger's News

Week of 2/5

Wow! What fun we had this week. Many thanks to all of the families helping out with all of our special projects! It is not too late to send in a gift of warmth if you have not already done so, thanks to those who have already contributed.

6th Grade Science: We'll be back on track with extreme weather on Monday. We will talk about tornadoes, hurricanes, and predicting the weather. I will attach the review sheet, and we will pick a test date as we see how the week progresses. Expect the test the week after next, watch agendas.

5th Grade Science: It is Ex-STREAM week. We will be building vehicles and using what we learned about force and motion to make them move without touching them. If your child has any recyclable or crafty items that he/she would like to use or share, send 'em on in to us.

5th Grade Religion: We will be discussing how Jesus shares Himself with us in the Mass, learning the parts of the communion rite, learning how to carry Jesus to others, and working on our interactive notes to give the correct response during the Mass.

Have a wonderful weekend,

Ms. JoAnn Ensminger
