

ST. CHRISTOPHER SCHOOL IS A STREAM SCHOOL!

We are extremely proud and excited to announce that St. Christopher School was awarded the opportunity to participate in the Diocese of Buffalo's STREAM Education Initiative. The initials in STREAM refer to the subject areas of Science, Technology, Religion, Engineering, Arts and Math.

STREAM Education uses an interdisciplinary approach to bridge subject areas. It is not a new curriculum to us at St. Christopher, but is a philosophical framework for delivering excellence in education for 21st century learners. We endeavor to create holistic, real world learning experiences, so our students can put their knowledge to use developing ideas and solving problems.

At St. Christopher School you can expect to see in action, a variety of new after school clubs, hands-on science kits in the classrooms and enriching field trips.

WHAT IS STREAM LIKE IN THE CLASSROOM?

Lessons based on STREAM promote a higher level of critical thinking skills and a deeper understanding of content materials because concepts are reinforced across multiple subject areas. STREAM activities are hands-on; project based learning and have relevant application in the real world. Critical Thinking + Creativity + Collaboration + Communication+ 21st century learning.

STREAM Education also incorporates the creativity and expression of the Arts and our Faith as integral components of a 21st century Catholic education.
